**"The most specialized center  
in Isfahan province"**

**@cutunix.njf**

**The Cut Unix Group operates by relying on the experience and technical knowledge of its experienced personnel, as well as by using modern and well-equipped machines in the construction industry, especially MDF and wood.**

- By collecting various accessories and materials in this catalog, we have tried to facilitate the access to the equipment you want.**
- Through the Kat Unix collection, you can buy directly from the best manufacturers and reduce your costs. To learn about these items, see the catalog carefully.**
- By ordering a 3D design from our professional designers, before purchasing the equipment, view the simulated sample of your favorite design so that you can choose the closest to your taste.**
- By choosing our collection, you will have the best choice for decoration in the shortest possible time and at the lowest cost. Contact our experts to buy and receive advice.**

## 3D Design

To create a beautiful view in interior architecture, different phenomena are needed, which are determined according to the use of the building. For example, the interior of a residential building is different from an office environment. However, some principles and techniques for changing and beautifying the interior of all buildings are the same.

## Door cover and anti-theft door

Providing design services, sheet preparation, CNC, vacuum, and polyurethane paint

ABS Door cover

HPL Door cover

### PVC coating:

**PVC coating is a type of plastic that is widely used in the wood industry. This cover is resistant to moisture, acid and alcohol and is easily used.**

### Melamine coating:

**Melamine coating can be installed on MDF and chipboard. These covers are highly resistant to heat, moisture and wear and are used in furniture, bedroom accessories, building doors, etc.**

### HDF cover:

**These covers are usually made of HDF, molded HDF sheets and so on. It is melamine sheets. HDF covers are usually used for bedroom and bathroom doors.**

Wooden door cover

PVC door cover

#### ABS coatings:

**ABS prevents the penetration of water and moisture into the doors. ABS coatings use a liquid called resin that increases the life of wooden doors.**

#### Polyurethane coating:

**These covers are affordable and easy to work with. Resistance to pressure, impact and scratching is one of the important features of polyurethane coating, which increases the lifespan of doors.**

#### Cover press:

**Press doors consist of two layers of MDF and two layers of natural wood veneer, which are made of the desired wood and cover both sides of the door.**
